**DETAILED ACTION**

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance: for claims 1-2, the best prior art of records (see the cited references) does not teach or suggest a method of providing an automatic gain control in a receiver structure that includes steps of: computing a percentage of clipped samples; setting a target energy value based on the percentage of clipped samples; and updating the gain setting based on the target energy value and the average energy. For claims 3-5, the prior art also fails to teach an automatic gain control system for regulating a received RF signal that includes a gain calculation block arranged for determining the target energy value based on the clipping percentage and the gain setting of the adjustable gain amplifier. Therefore, claims 1-5 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
